

Name _____

Date _____

Colorful Creation

What are your favorite parts of creation?

- In the five large stars below, write the name of something you can find in the air or in the heavens. Color the stars yellow.
- In any three spaces where there is land on the Earth, write the names of creatures that live on land. Color the land green.
- In the remaining spaces, write the names of three creatures that live in water. Color the water blue.

If you like a challenge, try thinking of things in each group that begin with the same letter.

Write a thank-you prayer. Tell God how you will help care for creation.
